Working Group Meeting Outcomes:
June 28, 2021

Public Comment: Jim Powell made a comment on the Arnold Irrigation District's conserved water. The water being reclaimed by piping is not the district's water to give away and it shouldn't be listed as such in any discussion. He wanted to remind everyone that this water is different from the water assigned to land under the formation of the irrigation districts.

- He provided a link to make comments: https://oregonwatershedplans.org/arnold-id
- Comments are due July 8.

April meeting notes: There were no edits or corrections, and they will be posted as final.

Technical Committee: They will be taking a field trip to visit the Smith Rock-King Way projects. They will open the field trip to the entire membership.

- ***Comprehensive Planning Timeline:*** They are moving towards completion in 18 months, even if that includes placeholders with direction for completing the plan. However, their main focus is giving this the time it needs even if it means a 2 year build.

Legislative Committee: they will lead a recap of what came out of the session at the August working group meeting

Outreach Committee: Working on the brochure and powerpoint. Currently drafting a problem statement.

Groundwater Committee: will be drafting a memo to codify the relationship between OWRD and the committee. They have paused their work in order to align with the department's work. They will be meeting again the first Thursday in August.

OWEB Grants: The DBWC applications moved on from the regional review committee.

Yakima Basin: Lisa Pelly (Trout Unlimited) and Urban Eberhart (Kittitas Reclamation District) presented their water planning process with the linked PPT Slides.

Next meeting agenda: No additional agenda items were proposed. See agenda item in the legislative committee report.
