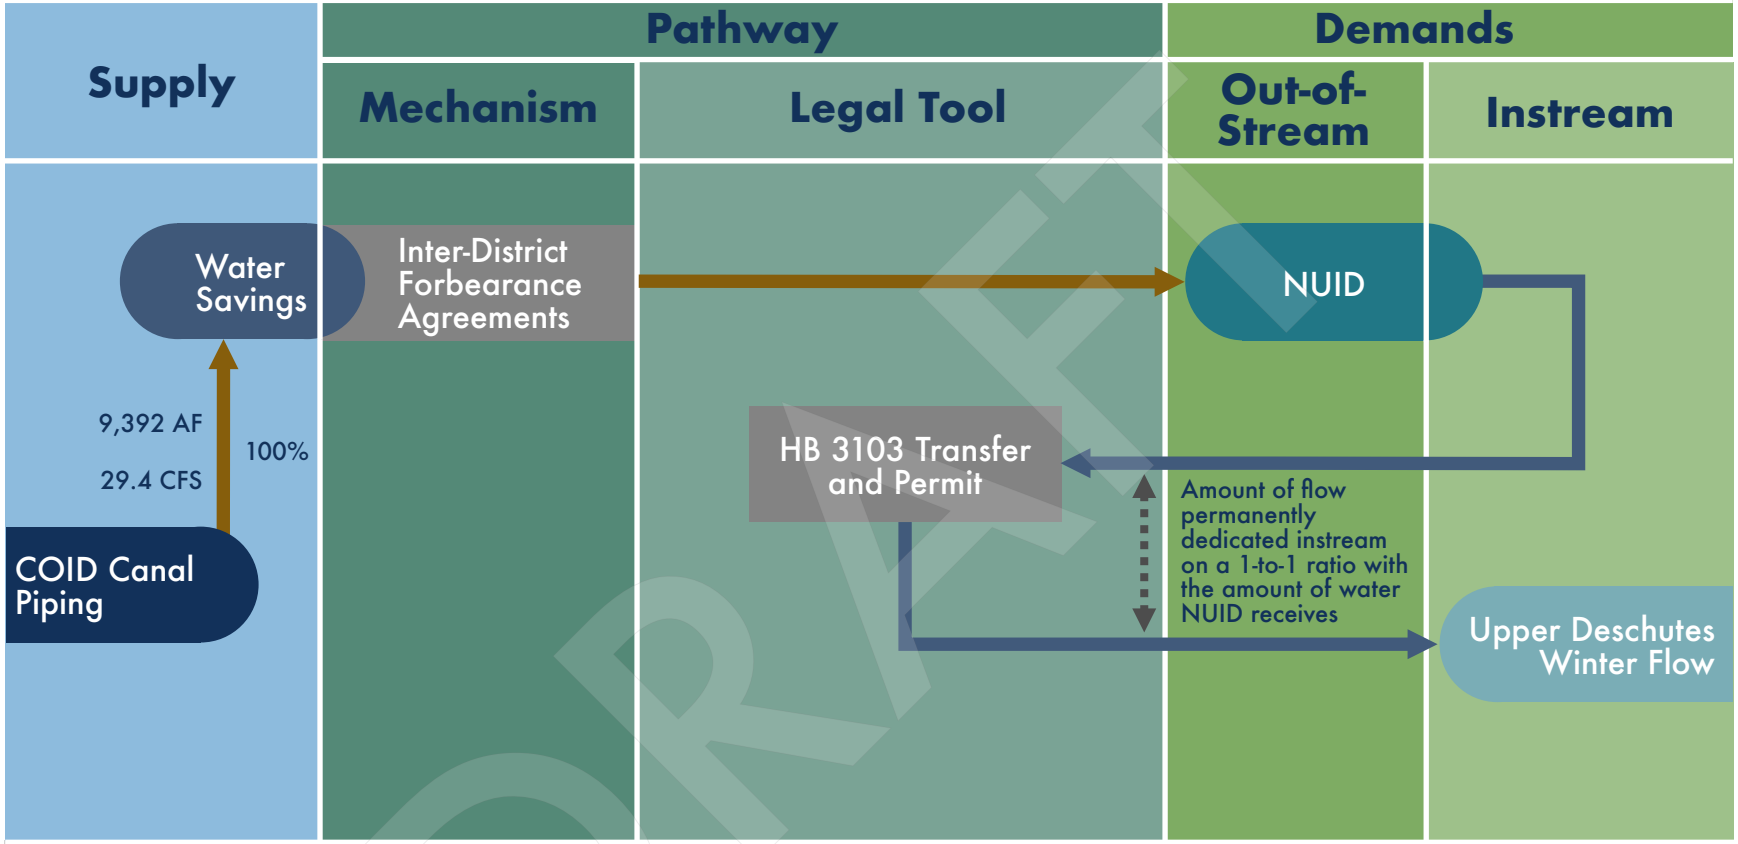
Options for Action: COID (45,000 acres) Canal Piping (Smith Rock-King Way)*



Key Issues to Address

- Determination of remaining right consistent with allocation of conserved water process
- Protection of saved water from diversion by users senior to NUID
- If water is wheeled through COID system to NUID, agreement between the two districts on costs

*Per projects described in the pending watershed plan proposed in June 2021. Use of the options illustrated above has not been endorsed by the Deschutes Basin Water Collaborative.
